

Introduction to the Belgian students' paper on the Lost Colony

The Lost Colony Center for Science and Research is proud to represent here two Belgian college students that we have been mentoring during this past year. We think it is quite unique to have a research paper presented on our website in the original Belgian script. Please find below the original translated copy of Mathijs Meert and Koen Vorsters research paper. This unique collaboration impacts our research and gives it a new pleasant flavor.

Fred Willard, Director: The Lost Colony Center for Science and Research
